

Summary of 2013 AOTULE Program at Tokyo Tech

- Outline:

- 3-month (Jun. 3 to Aug. 30) summer exchange research program

- Participants:

- 15 MS + PhD students (9 AOTULE Univ. missing ITB)

- Activities:

- Research Project (main activity for the students):

- At host professor's research group in the Tokyo Tech Graduate School of Engineering

- Course works:

- "Survival Japanese": One week, morning session of very basic "survival Japanese" lectures for those who are permitted to attend based on the placement test of Japanese proficiency
- "HighTech Japan": Lectures by engineers/researchers from industry + factory/facility tour

- MISW 2013, Aug. 8-9:

- MISW = Multidisciplinary International Student Workshop at Tokyo Tech
- Oral presentation of research / Poster to introduce their home institutions

- Certificates (optional)

- Certificate of the period of enrollment as an International Exchange Student
- Certificate of Research (based upon evaluation of their activities)
- Academic Records (score sheet for course works)

- Evaluation:

- Web questionnaire after the programme
- High satisfaction, over all
 - 12 out of 13 chose the highest rating
- Comments and suggestions
 - Period too short (3 months) for research -> apply for other programs?
